Distressed Energy Asset Services

We have a proven success rate in assisting owners with restructuring existing assets to become competitive in today's ever-changing market. We are a company dedicated to rejuvenating power projects in need of either technical or economic remediation, and can provide a wide range of services to fit your needs.

Financial Services

Our accounting staff is capable of handling your finances with expertise and ease. We're proud to be flexible in crafting the exact scope to meet each unique need. This includes handling financial statements, budgeting and forecasting, tax services, and much more.

THE PUREENERGY DIFFERENCE

Client-First Philosophy

PurEnergy understands that no two clients are alike, which has led us to be flexible and tailor our services and processes to meet specific needs. We provide access to all resources within the company, especially senior leadership. In addition, we are available 24/7 to address any issues and strategize about how to create value.

Cost-Effective

Our existing platform, including people, systems, and tools, allows us to manage your facilities in the most cost-effective ways.

Unparalleled Resources

We have access to unparalleled resources through our corporate parent NAES Corporation and its affiliates. This includes technical and market consulting, construction and fabrication, and environmental and regulatory compliance.
