

Full range of services covers entire facility life cycle

- Construction oversight
- Business management
- Contract administration
- Energy mgmt oversight
- O&M oversight
- Fuel management
- Restructuring / turnaround
- Accounting, billing, cash mgmt
- Audit / tax management
- Regulatory compliance
- Capital improvement projects
- Onboarding / transition support
- Sale / financing support
- Decommissioning

Current Projects

Member of the NAES family of companies

Access to all NAES resources:

- 160+ plants operated
- NERC services
- Safety planning services
- Grid balancing
- Remote monitoring & dispatch
- IE & OE
- Staffing services
- Construction

Today

44 facilities
13 GW capacity

Lifetime

24 years experience
82 facilities
21 GW capacity

Project Experience

Natural gas (CT & CCGT) * wind * solar * biomass * hydro * coal * midstream oil & gas * material recovery * other industrials * offshore oil rigs

Geographic Coverage

Experienced across the U.S., in all ISOs/RTOs * Canada & Mexico capabilities

PurEnergy Turns \$75M Exposure Into \$220M Profit for Pittsfield

- Negotiated settlement and buy-outs to free Pittsfield from all steam host agreements
- Extracted maximum value from gas supply and gas transportation agreements
- Identified 5MW of additional capacity and renewed interconnect agreement to realize it
- Installed fogging overspray to one of the turbines to add another 5MW of potential capacity
- Reduced station service cost through ISO program
- Renegotiated all property taxes; optimized plant O&M

PurEnergy Scores \$1M Touchdown for Goal Line LP

- Constructed a supplemental cooling tower at minimal cost to increase capacity
- Maximized the capacity factor bonus under Goal Line's power purchase agreement
- Optimized the plant's run time to eliminate unprofitable operation; began cycling in response to market demand
- Reduced startup time by one half-hour
- Negotiated a more cost-effective gas supply contract
- Demineralized cooling tower water to reduce water consumption; negotiated lower sewer charges

PurEnergy Puts Selkirk on Path to Recovery in Less than 2 Years

- Eased the client's operating budget by charging much lower fee than predecessor
- Found a new energy marketer that took a more strategic and innovative approach
- Began selling power into ISONE, with better capacity pricing structure than NY
- Extracted maximum value from Selkirk's gas pipeline spur by marketing excess capacity
- Reduced staff by eliminating redundant positions
- Scrubbed the budget and optimized plant O&M
